

## Saving & Printing PDF

Below examples are with Google Chrome, scroll down for more info

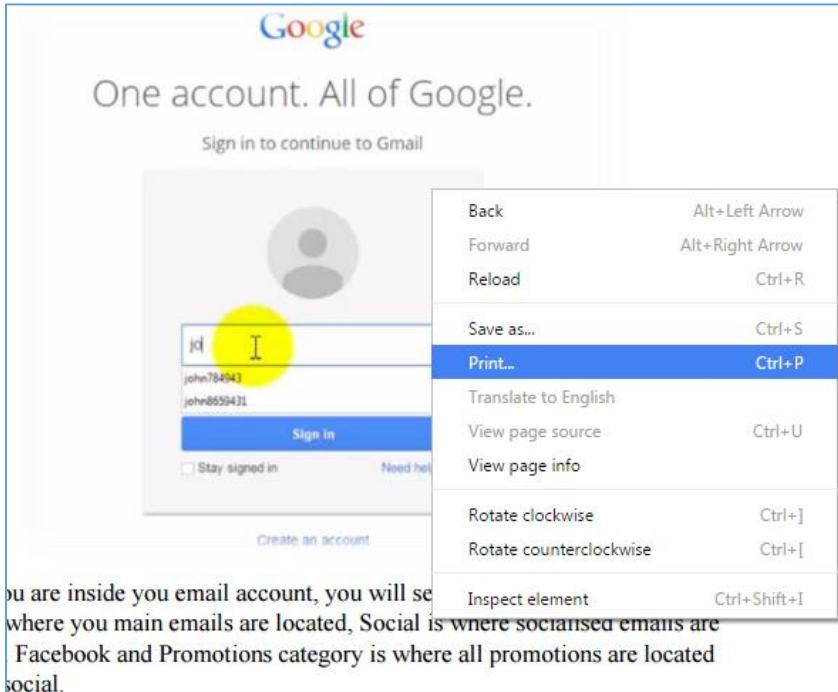

1) When pdf file is opened, click right on the mouse, Click **SAVE AS** to save

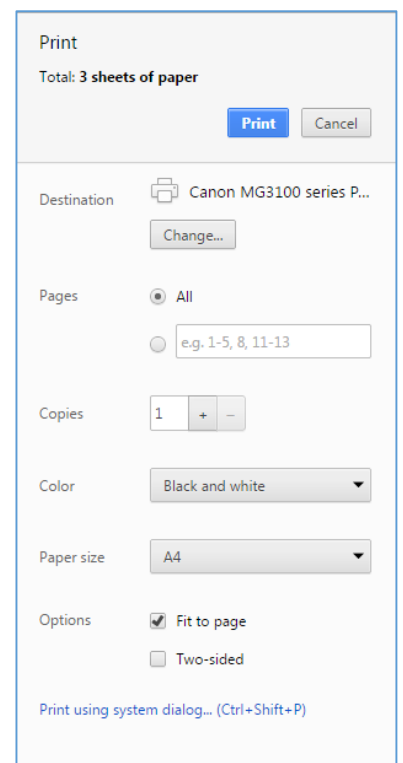

2) Choose your location and press **Save**

- 3) In order to print, when pdf file is opened , right click on the mouse and select **Print**

- 4) Use window illustrated on the right to select print settings, when it's ready Click **Print** (Please make sure your printer is connected to your computer)

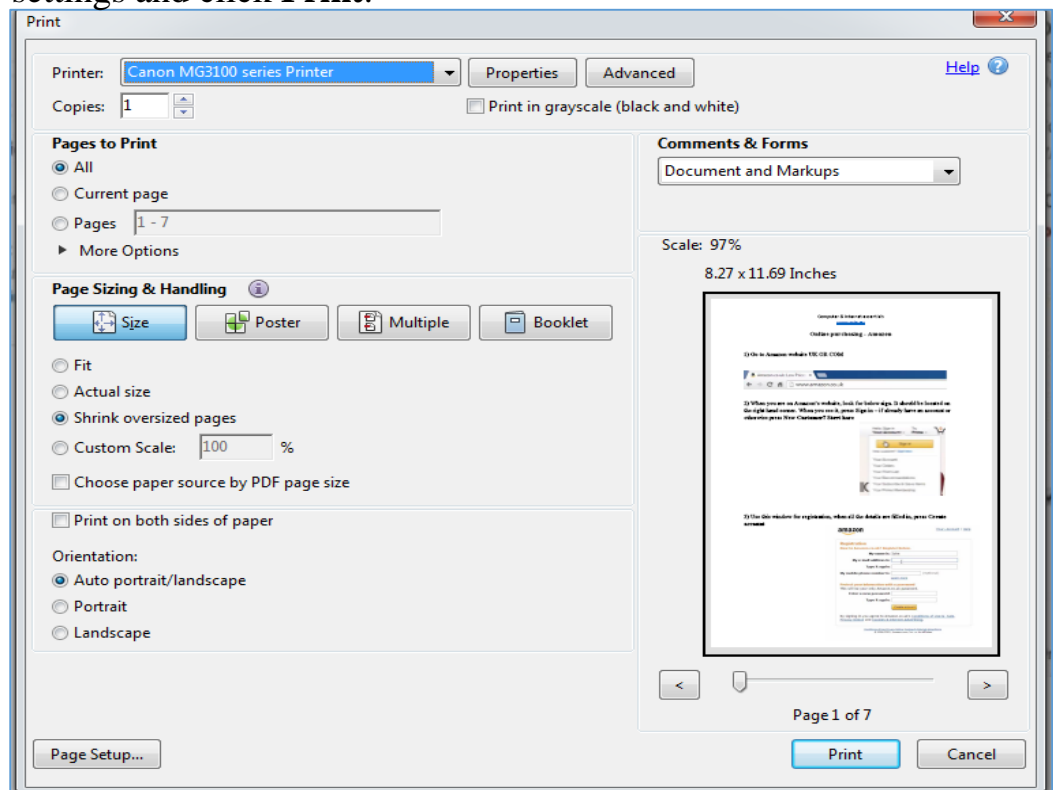

### Please note

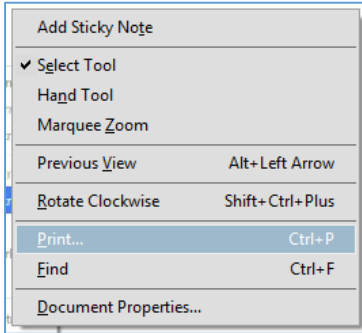

The above examples are for Google Chrome, therefore using different browser functionality might differ. Please take a look at below examples

You might see this small window appearing, so please use it. Save feature operates the same as explained in above examples.

When you press print button illustrated above you should see the following window, select your settings and click **Print**.

This feature is related to printing the PDF file, when the file is saved on your computer. **Right click** on the mouse and Click **Print**. Then the same printing principles will apply.
