

Downloading & Installing Skype

1) Type google.ie in address bar and press ‘**Download Skype for Desktop**’.

2) When you click on the highlighted heading above, you will be directed to below page. You then select your preferred device e.g. Computer and click ‘**Get Skype for Windows Desktop**’.

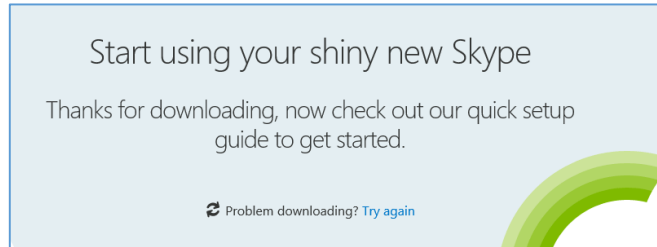

Skype for Windows desktop

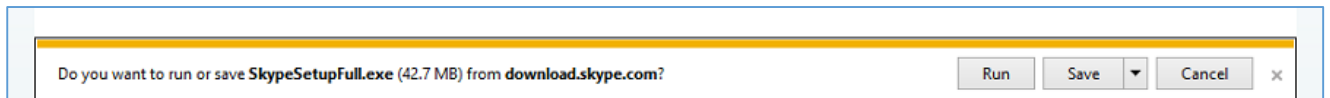

If you like to chat, work and do a lot more on your PC, then Skype for Windows desktop is the most powerful version for you.

3) When you click on the above button ‘**Get Skype for Windows desktop**’ you will be directed to below page , where you have to wait little bit until download loads , if you have a problem with loading please click Try again as shown.

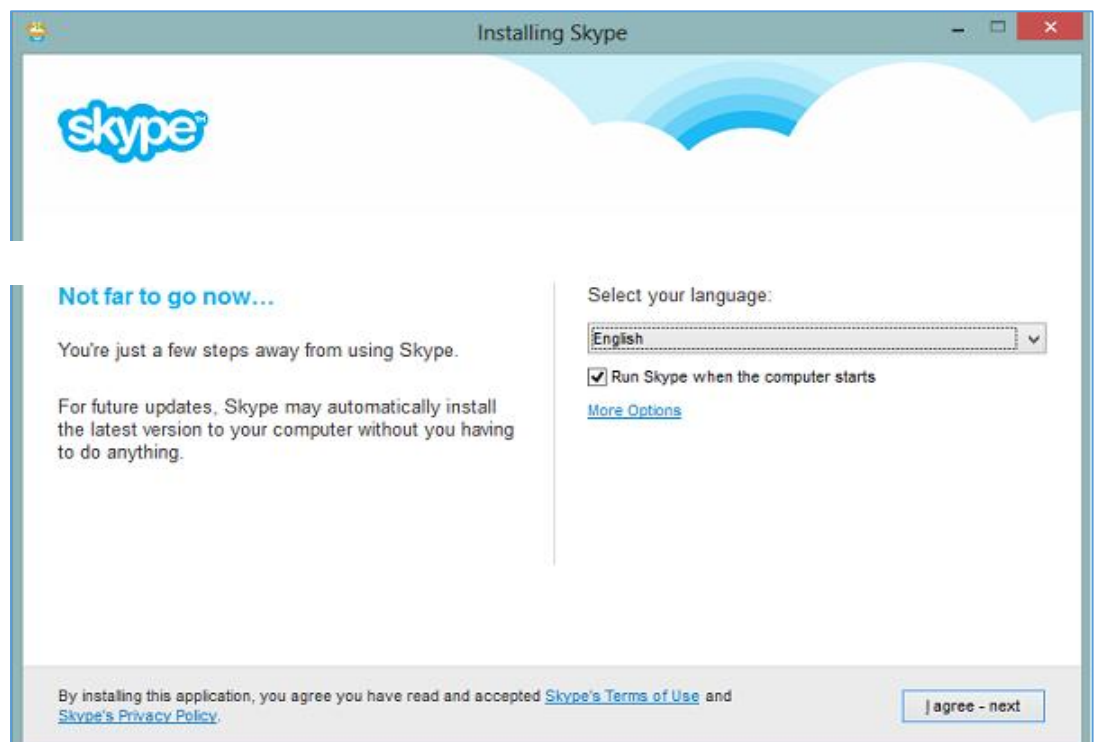

4) If loading is successful, the below window will pop but at the bottom of your browser, in which you press **Save** to Save setup file your hard drive.

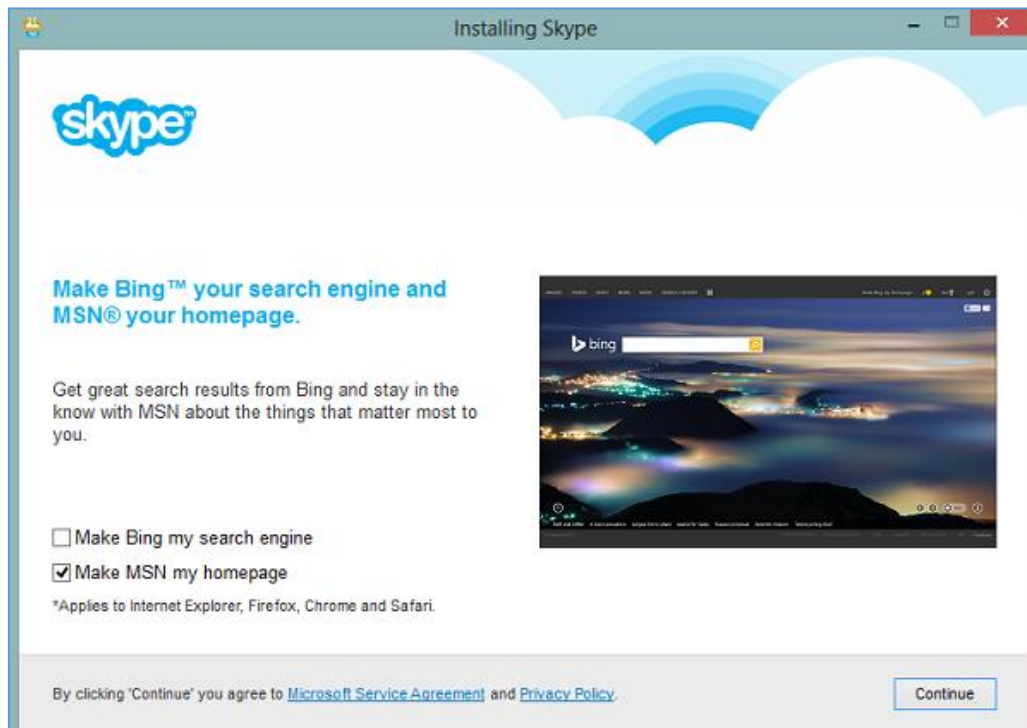

5) When downloading is finished, this window will pop up in the bottom of the browser. When this happens, you click **Run**.

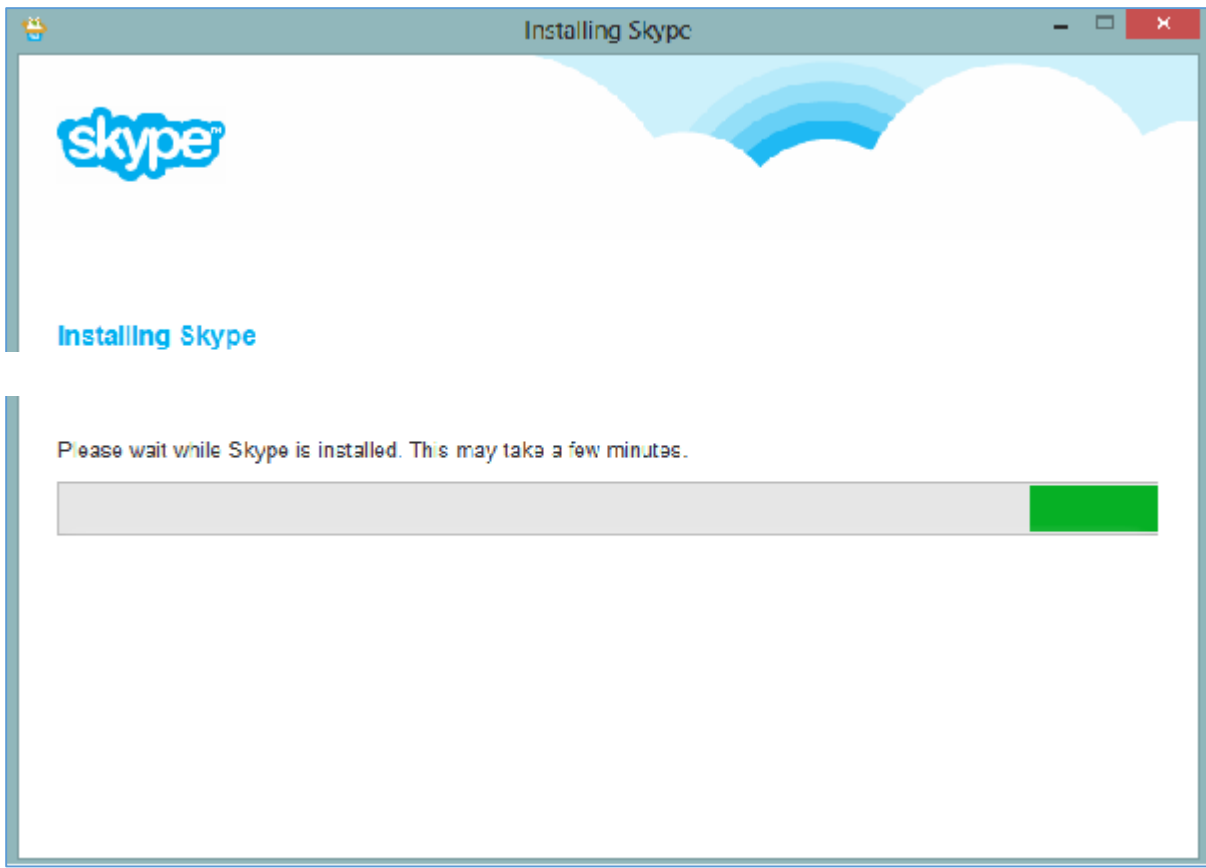

6) After clicking run, you have to wait little bit until the below setup window appears. When it appears you select you language and other settings and click **I agree – next**.

7) When you click I agree - next the below window will pop up. In this case leave it unpicked or leave the settings that Skype selected, and then click **Continue**.

8) When you click Continue, the below Installation window will pop up.

9) When installation is complete, you will see this window.
